

## Minor in Linguistics

Fall 2016-Spring 2023 Requirements

### What is Linguistics?

Linguistics is the scientific study of human language. Language is one of the most complex cognitive tasks that humans engage in, yet it is used effortlessly and subconsciously and is acquired by infants with no formal instruction. Language can be studied from many different angles: its formal properties comprise the core areas of phonology, morphology, syntax, and semantics; psycholinguistics is the study of the psychology of language (how it is represented in the mind/brain and how it is used in real time); language acquisition studies how infants acquire language; sociolinguistics studies language as a social construct; language typology investigates how language differ and how they are the same. Applied areas of linguistics seek to improve methods of teaching second languages, or to improve the treatment of language disorders.

### Linguistics Minor Requirements (18 credits)

- Students must earn a C- or higher in all courses within the minor.
- To receive honors credits for a 600-level course, please e-mail [cgsc-advise@udel.edu](mailto:cgsc-advise@udel.edu); failure to do so may result in problems with your degree checkout.
- Students minoring in Linguistics and minoring or majoring in Cognitive Science may not count the same courses towards both programs, with the exception of LING101.
